PROJECTS

C-Line Shell | GitHub *Aug '25 – Sept '25*

- Engineered a custom command-line interpreter (CLI) in C, emulating core shell functionalities including command parsing, tokenization, and process execution.
- Achieved cross-platform compatibility with Windows/Linux by implementing conditional compilation macros to handle OS-specific system calls like fork/exec vs CreateProcess.
- Optimized memory management for the command history feature using dynamic data structures, ensuring efficient resource utilization during extended sessions.

Secure Encryptor/Descriptor App | GitHub | Live *Sept '25 – Oct '25*

- Developed a secure file encryptor application using Spring Boot, integrating a cryptographic module for real-time encryption.
- Implemented AES-GCM (Galois/Counter Mode) standards to guarantee both data confidentiality and integrity, mitigating tampering risks for user uploads.
- Containerized the application using Docker, ensuring consistent deployment environments and reducing dependency conflicts by 40%.

CERTIFICATES

- Fundamentals of C Programming – CSEPathshala | Link *July '25*
- Fundamentals of Network Communications – Coursera | Link *Sept '24*
- Introduction to Hardware and Operating Systems – Coursera | Link *Sept '24*
- The Bits and Bytes of Computer Networking – Coursera | Link *Sept '24*

ACHIEVEMENTS

- Secured a 4-star rating in C language proficiency on HackerRank.
- Earned a 3-star rating in Python programming on HackerRank.
- Achieved 4th Position in Binary Blitz Hackathon by Coding Ninja LPU.
